

## KITCHEN Glass & Mirror TVs

Coolvision now offers you a completely new art of entertainment – and that at the most sophisticated level. By means of an integrated display screen using TFT display technology, you can now watch TV, SAT, DVD, VHS or use the screen as a PC monitor. Integrated into a cabinet, directly over a hotplate or on the wall, the Coolvision monitor system offers you the opportunity to create your individual kitchen TV.

This superbly attractive product is available in a wide choice of screen sizes, combined with a choice of coloured glass, crystal mirror or magic mirror finish in sizes up to 2,390mm x 1,390mm. All electronic components are hidden behind glass, so that it is protected against humidity and dirt. You can install and harmonise this intelligent mirror monitor system with the interior of the kitchen, there are no limits for your fantasy.

- LCD panel sizes 6.4", 10.4", 15", 17", 32", 37", 46"
- Only 22 to 60 mm installation depth
- Transmission: TV tuner, SAT receiver, DVD, PC, video, camera, etc.
- Sound system: invisible sound source behind glass, infrared loudspeakers or connection to the existing system
- Remote control
- External ON/OFF unit, on request also with a timer
- Glass available in RAL colours maximum size 2390 mm x 1390 mm
- Mirror available in Crystal Mirror maximum size 2390 mm x 1390 mm or "Magic Mirror" size 1990 mm x 990 mm
- Special features: e.g. black mirror / sand blasted elements on the mirror surface
- Simple assembly and installation of the entire system
- Electronic components are insensitive to dirt and spray water due to the "behind the mirror installation", easy to clean.
