

## CORPORATE - POS Glass & Mirror TVs

Wherever we are, monitors have conquered our everyday sales environment. Therefore communication has to be creatively staged in order to be realised. The patented "Mirror Technology" combining a high end LCD Active Matrix with a special mirror or individually designed glass enables the MAGIC WINDOW to become the future standard of sophisticated brand communication. Complemented with a special "Mood Light Function" the MAGIC WINDOW can automatically change colours and by using the "Magic Mirror", the screen will be totally invisible when turned off.

In addition "the behind mirror installation" of the electronic components ensure that the system is protected against dirt, vandalism and theft.

- Individual design opportunities in glass, mirror, frame and bottom
- New LCD Active Matrix, screen sizes 23" and 30".
- Excellent audio performance behind glass without sound opening
- Thief proofed through closed front and backside glass elements
- Protected against vandalism through "behind glass installation" (TSG/LSG)
- Screen disappears behind "Magic Mirror Technology"
- Dimensions 103 x 203 x 10cm, stand diameter 115cm
